SSM Exercise 1

I.G.Batten@bham.ac.uk

Assessed Group Work

- Are you OK with working in groups of three/four, with marks awarded equally?

- Would you prefer that I allocate groups randomly, or you choose?

- I **really** don't want to have to get involved in assessing individual contribution.

- Each marked exercise is 10% of a 10 credit module in a 180 credit programme: difference between 0 and 100% is 0.5% of your final mark.

- Learning much more important than marks at this stage.

- If anyone unhappy about this, come and see me and we will sort something out.

What I want

- Describe an enterprise (suggestions: web-based Taxi company, small university department).

- List a subset of the information assets (perhaps ten).

- List the threat sources and threat actors, and assess their motivation and capability (you can use the IS1 worksheets or do something yourself).

- List some compromise methods, with attack trees where appropriate

- (For four-person groups) Evaluate the risk using IS1

Deliverables

- A report (<10 pages); **OR**

- A presentation (~20 slides); **OR**

- A video of a presentation (~20 slides); **OR**

Other Exercises

- Will be either group or individual, depending on how this one goes.

- As I say, learning more important than likely <0.25% mark variance

Dates

- Formal release on canvas 21 October

- Submission 28 October

- Marks and feedback by 14 November
